COMA

How do you know someone is in a coma. This is the Glasgow Coma Test. The higher the score, the better the person is fairing. If someone hits their head and there is swelling in the brain, it is possible a concussion or coma may occur:

Eye:	**Does not open the eyes**	**1**
	Opens eyes in response to painful stimuli	**2**
	Opens eyes in response to voice	**3**
	Opens eyes spontaneously	**4**
Verbal:	**Makes no sound**	**1**
	Makes incomprehensible sound	**2**
	Utters inappropriate words	**3**
	Confused	**4**
	Oriented, converses normally	**5**
Movement:		
	Makes no movement	**1**
	Extension to painful stimuli	**2**
	Abnormal flexion to painful stimuli	**3**
	Flexion/withdrawal to painful stimuli	**4**
	Localized painful stimuli	**5**
	Obeys commands	**6**

Severe condition: 8-9 points **Moderate: 8 or 9 – 12 points** **Minor: 13-15**

COMA – Sometimes this works to bring someone out of a coma: (also use for Trauma):
Press top of arm on each side of body. Hold 10 minutes.
