PAIN THERAPIES

Pain is usually caused by inflammation – so using cold packs (ice) on an inflamed area will alleviate the hurt. Remember though that the body is using inflammation as its own healing process. For old injuries use heat instead of cold applications. If using cold/ice – wrap the ice in a cloth, apply to skin/area for 20 minutes, then take it away for 1-2 hr and repeat. If using heat eg. Hot water bottle or heating pad – you can use this longer, eg. 40 - 60 minutes.

Our clinic has used many types of therapy over the past 30+ years. We have been trained and have found many of these therapies to be very successful. Here are some of the ones we have used. The information is taken from the various company's training and information manuals and we apologize if we perhaps haven't lived up to their expectations.

CRANIO SACRAL THERAPY

Cranio Sacral Therapy is a gentle therapy. Perfect for those who are nervous about using chiropractors. It is much in demand. You can get training from several places, but we think the first one and certainly a very good place, is the Upledger Institute which is located in Florida, but they have teaching sessions all throughout North America and do provide certification courses for different levels of training. You can reach them by phone (561 622-4334) or toll free 1 800 233-5880. Website is www.upledger.com

This type of bodywork works well to accompany a massage business or any type of energetic type of healing. It uses very gentle and patient pressure to guide the craniosacral fluid which goes through the whole body, releasing tension in the muscles, ligaments and bones to help them return to their natural state. It is safe and effective. No need to disrobe for Cranio Sacral Therapy.

There are probably several people in each town/city in North America that can help you if you would like treatment. Search online to see, or contact Upledger and they may have lists of practitioners in your area.

In Medicine Hat, Donna Rae is too busy with doing consulting work to do Craniosacral Therapy now, but there are several people that are excellent:

Don Boire **(403) 502-0207**

BOWEN THERAPY

One day a fellow walked in who I knew was having back problems and he was walking really good. So I asked him what he had been doing to help his back. "Bowen" he said. I never heard of it, but he said he only had two treatments and was fine ever since. I need to know what works for my students and clients, so I did some research and found a doctor was teaching level 1 of Bowen in Calgary. I took level one, and although this isn't what I wanted to do with our clinic, I did want to understand it, especially because it was such a safe and subtle therapy.
In Medicine Hat, Alberta, Yvonne Affleck has taken advanced training and does a beautiful job with Bowen, having taken advance training. Her number is (403) 502-9380.
yschoicewellness@gmail.com
Bowen is a therapeutic soft-tissue manipulation technique that is applied to the muscles, tendons and ligaments of the body very gently and with minimal pressure. The skin is gently rolled over specific points in the body; I liken it to plucking guitar strings that set up a vibration, allowing the tendons, ligaments, muscles and nerves to adjust and normalize.
No need to disrobe for Bowen. It is a slow, gentle process. First an adjustment, then rest 2 or more minutes before the next move Some people find relief immediately after the session. Others say they feel nothing until the next day. A session can last 15 minutes, but usually will take one hour. There are some rules the practitioner can tell you about to make sure you get the best treatment needed.

CHIROPRACTIC ADJUSTMENTS

So many problems come from our neck and spine bones. The central nervous system nerves travel from those neck and spinal bones to all your organs and muscles. Even the legs, knees and feet will be affected by the lower bones in the spine.

History of Chiropractic care began in 1895 with Daniel David Palmer, born in Port Perry, Ontario, Canada who restored a man's hearing through spinal manipulation.

Some people are nervous about using chiropractic care because of the cracking that can occur in the neck with an adjustment. Although so very few problems have been reported with those type of adjustments, it has still made people nervous so several years ago an adjustor device became available for chiropractors to use to do adjustments without the 'cracking' of the neck.

I first became aware of chiropractic care around 47 years ago when I met a man who had been vomiting every day for 3 years. No one could help him and he heard about chiropractic and decided to take a chance. After one adjustment on his back, no more vomiting! There are many stories like that that we have heard. I have all of my own stories – crawling into the chiropractor's office so dizzy I couldn't stand up, and walking out several minutes later. Adjustment to a trigemenal nerve in the jaw, no more pain in the face.

BIO MODULATOR THERAPY

**Dr. Jerry Tennant brought this wonderful therapy to North American.
You can read his books "Healing is Voltage" that you can get on amazon. That will give you a good idea of what this is about. He teaches that repair depends on sufficient cellular voltage and correct polarity.**

It uses a handheld device that measures and delivers voltage through bioadaptive microcurrent to the body as needed.

This doesn't just help with pain management. The device records the voltage energy wherever you place it on the body, giving you a very good idea of where the problems actually generate from. It will actually tell you if the voltage is normal or how critical it may be to need help. He then uses the device to input correct energy where needed to help restore.

He also has developed and sells a bio-transducer which emits powerful scalar energy to the area you want to support. This is the most powerful scalar output we have seen and works very well. It can pass through clothing which is helpful.

His training will teach you whether the sphenoid bones behind the eyes are out of balance, and how you can simply correct the imbalance. You can measure the energy of chakras, organs, muscles, acupuncture points, meridians. You can learn how you can use the Transducer for Macular Degeneration, and to help the brain using various voltages.

**If you want to be a practitioner using this therapy, there is wonderful training available through Dr. Tennant's office. 1 (972) 525-7412 in the U.S.
You can purchase the devices from Dr. Tennant directly, or in Canada: Bob Moore, Biohealth email: bob@biohealth.ca**

RED LIGHT THERAPY - Photobiomodulation

During the covid years we heard about a device using red light therapy that was being successfully used to treat many disorders. We contacted the company in Canada and obtained the first Palm device that was nice and small to handle and you could use for small areas like the neck, knee.

These medical grade devices run directly with electricity so they never need recharging. Tom Kerber in Canada will set you up with anything you like (sunpowerled.com). In Canada they are located in Hamilton, Ontario, phone 905 643-1212. In the U.S. The phone number is 1 888 913-0012.

After using the Palm red light device, it worked so well, we got the full body panels to handle large sections of the body like the back and hips, and then we got the helmut which delivers light through the skull to support neurological healing and cognitive

clarity, useful for depression, parkinsons, traumatic brain injury, dementia, concussion recovery.

The red light delivers 660nm Red Light wave length and is often used for only one minute which goes into the short distance of the lymphatic system, then you switch over to the 810 nm wavelength Near Infrared Light (violet) to enter the deeper tissue of the muscle and bone. Most people use the red light for skin issues (eg. Anti aging), and lymphatic issues.

These are easy to use and easy to learn how to use with lots of videos on youtube.

SCALAR WAVE THERAPY

Our clinic has been using Scalar Wave Therapy for many years. They produce results and anyone can learn how to use them. These devices are rechargeable so you don't need to keep replacing batteries.

Paul and Lillie and Essencia Weisbart are Founders and Developers of the Stillpoint Process (stillpoint is used by craniotherapists to bring the body to a point of stillness for the body to be receptive to healing and change) and inventors of the Scalarwave Laser Family of Products. They are based in Maui and offer trainings and seminars sharing this unique subtle yogic state of Stillpoint.

You can contact them (scalarwave,com) to find centers near you that sell and teach how to use this therapy.

The Scalar Wave Laser is cold laser or low level laser system. This class of lasers is also often referred to as a soft laser or healing laser and refers to very low powered lasers, which have been designed to gently rejuvenate cells. Low level lasers are totally safe and work on a completely regenerative basis.

Cold lasers rejuvenate the cells by gently donating energy in the form of photons, which then increases the energy molecule of the cell, called ATP, which in turn stimulates the cell to grow more efficiently. This works in the same way that a garden works. Sunlight donates photons, which in turn energizes the plants to grow bigger and healthier fruits and vegetables.

They are used for injuries and pain relief, stress and dis ease, facial rejuvenation, smoking cessation, organ detox and balancing, cranial and glandular unwinding, acupuncture and energy healing, lymphatic wellness and rejuvenation and quantum activation and shift to the unified field.

Scalar Wave Protocols are not designed to treat or cure medical conditions. Rather this approach is based on the understanding that the body is fully capable of rejuvenating and finding solutions to its injuries and dis ease. Especially when its key quantum systems are relaxed and at ease, and when there is plenty of coherent energy available, either from lasers or the universe of which we are all connected.

The universe is filled with coherent neutral energy, or space. When people become stressed and tense they hold onto cellular memory, which renders the body incoherent. When the body is incoherent it no longer taps into the vast reservoir of space and neutral energy.

Their approach to lasers is to unwind and clear this cellular memory so that the body can relax and unwind and open back up to the abundant energy of the universe. When it does this, injuries, stress and disease disappear. As does energy when it flows and is abundant is vital and full of life.

So in summary the approach is not fix or heal the injuries or the "dis" "ease", rather seek to unwind the cell memory which tells those cells and body systems to remain closed off to the universe of energy. Unwind this stress and tension in much the same way that an old tape recorder is erased, by simply reversing the polarity. The Scalar Wave Lasers use a revolutionary Scalar Wave technology to achieve this ability to easily delete the cell memory.

What Makes Wave Lasers Unique

All low level lasers donate energy in order to rejuvenate the cell. What makes these soft lasers truly unique is the ability to clear the cell memory. Cell memory is the stress or tension pattern underneath all injury and dis ease. And our proprietary technology activates scalar waves, which neutralizes all polarity and shifts the cell memory. This quantum laser approach can be applied to any injuries, stress, tension, dis ease, or to activate the key body systems such as the glands, organs, chakras, meridians or any of the cells which make up the body.

The Scalar Wave Laser Approach

Basically the Scalar Wave Laser approach enables the user to regenerate cells and to clear stress and tension pattern of cells in the body. It comes with built in protocols for all body systems, organs, glands, chakras, meridians and cells of the body. You can also run unwinding protocols, quantum protocols, detoxifying protocols, regenerative protocols, and protocols for dealing with emotions, stress relief and the activation of consciousness.

Scalar Wave comes with probes that can be directed to areas for healing:
405 is a Violet Laser Diode Probe, said to shift the body into Unity State
650 is a Red Laser Diode used for soft to medium tissues
780 is an Infra-Red Laser Pulsar Probe used for medium to hard body tissue.

The Scalar Wave Laser training process is based on a quantum understanding of the body called the Unified Field Protocol. This revolutionary low level laser training approach is based on the understanding that cells love to grow and are very good at doing this.

Anyone who tells you that the body does not regenerate are not telling you the truth, the

only thing that the body does is to constantly regenerate cells. The Scalar Wave Laser approach is based on using lasers to donate energy to regenerate the cell.

All of our protocols work on the understanding that in order to assist the cells and the body to do this work of regenerating cells we have to first unwind or clear the cellular energy. This cell energy is what limits new cells from the full state of energy and the quantum state wellness.

The Unified Field Protocol

The Unified Field Protocol is a proprietary process for unwinding cells, organs, glands, meridians and chakras into the unified field. Basically all cells and body systems are designed to be relaxed and at ease in neutrality. The universe is 99 % neutral energy or space and when we relax and unwind the polarity, or cell memory, the cell opens up to this unified field of energy.

Our approach is to restore harmony to the field, which is the underlying and essential nature of the body. In fact, the body is really a dimensional contraction of the field. When we understand the nature and operation of this dynamic relationship our work as stewards of health is to simply unwind, clear, detoxify, regenerate or activate the system.

Cranial Sacral Wave

The protocols work with a systematic understanding of osteopathic principles in order to unwind the sympathetic nervous system and to reintegrate this into the parasympathetic nervous system, which is where yogis and mystics reside.

When we are relaxed and at ease and the cranial sacral wave front is unwound, it shifts or neutralizes into the quantum state often called the still point. Yogis and Mystics refer to this place as the space between each breath. The Unified Field Protocol aims to return the cellular field or body to this quantum state of being neutral which naturally plugs us into the vast and neutral field of energy, which makes up this universe.

MASSAGE THERAPY

Civilizations all over the world for the last many thousands of years have used various techniques of massage therapy to help pain and suffering. Especially muscle and ligament injuries will welcome massage.

This is something that you can also do to help yourself and friends and family. Just rubbing an area will bring blood and healing energy to that area.

USING THE RIFE TECHNOLOGY

Royal Raymond Rife (May 16, 1888 – Aug. 5 1971) was an American inventor and early exponent of high-magnification time-lapse cine-micrography. He was known for his

microscopes where he said he could observe live microorganisms, and for inventing an oscillating beam ray to devitalize disease organisms using radio waves (hertz frequencies).

His wife developed cancer, and he used his invention to successfully treat her cancer. His reports were published in 1944 and rejected by the American Medical Association and the American Society. The name "Rife" on machines was more or less outlawed and several people using them were sentenced to prison.

Since that time, Rife's information has gone underground and several people have developed new types of machines using the Rife technology, some calling them 'frequency generators', or 'rife like' machines. They use radio waves as did Raymond Rife, pulsing electric current through hand probes and/or foot plates.

Today there are many 'Rife" type machines on the market ranging from $50 to $10,000. The feedback we receive is that the people using these machines are very happy with the results and they continue to be big sellers on the internet.

ACUPUNCTURE - ACUPRESSURE

Many people find acupuncture helps with their pain. Over 30 years ago I took acupuncture from a Chinese Master in Vancouver and although I decided not to pursue this avenue of helping people, I learned a lot about meridians, acupoints, referred pain and how a simple application of needles in specific points of the body can have a profound effect.

On the negative side of acupuncture, I did notice that although it was great at stimulating flow of energy and helping with pain etc., it did not address the underlying problems and often problems with keep coming back until they were addressed. For example, acupuncture would take away the pain of a headache, but didn't address the cause of the headache.

Acupressure is similar to acupuncture, addressing the same points for applying pressure where you would normally insert needles. For those that have aversion to needles or want to learn acupressure for themselves, family and friends, this is something you can learn. Again, try and get down to the root of the problem and not just cancel the messenger.

B.E.S.T.

(Bio Energetic Synchronized Therapy)

Dr. Tom Morter and his father developed B.E.S.T. Therapy to help the body realign.

This particular modality balances energy in the body using polarity methods, including addressing emotional components that may be affecting the healing.

I know one Chiropractor in the U.S. who couldn't do adjustments any more, and decided to use the B.E.S.T. method, and last time I talked to her she was very happy with the results she was getting.

HERBS TO HELP WITH PAIN

The Chinese show us that pain is caused by stagnation and they use herbs that move the blood, treat congealed blood and they use herbs that stop blood congestion. The herbs move energy, qi and blood.

Many of the western herbs overlap the chinese, because we all have found the same results.

Herbs to move blood:

Ligusticum, Motherwort, Artemisia, Red Peony rt., Salvia rt., Ox Knee root, Three edge rt.

Herbs to treat ACUTE pain: (Use salicylates, aspirin type action)

Willowbark

- **cold and bitter**
- **for pain, fever, inflammation**
- **use 1 oz dried herb (30g) as tea.**
- **To enhance combine 2 part Willow with 1 pt cinchona bark, take 4 caps per hour for serious acute pain.**

Meadowsweet (above ground parts)

- **easy on the tummy**
- **take 15-30 ml as a tincture**

(Using Opoids, morphine type action):

California Poppy

- **warming, us flower and leaf**
- **for pain, sleep and anxiety**
- **1 oz plant as tea, or take tincture**

Corydalis ambigua (Yan hu suo)

- main herb in china.
- in Germany they combine this with California Poppy for a dynamite pain medicine. It moves
- blood and qi.
- for pain, sleep, anxiety and esp. good for menstrual pain.
- take up to 1 oz as tea, or use caps

Poppy seed (Papaver somniferum)

- for pain, sleep, anxiety
- up to 1 oz as tea

OTHER

Cold Packs

Putting on a cold pack to the area (we use frozen peas) for 20 minutes, then waiting at least an hour to reapply and doing several times will help the blood flow in and out of the area and help reduce swelling and inflammation for recent injuries.

FOR MAJOR PAIN

Feverfew (tanacetum parthenium)

- cold, bitter
- for chronic pain eg. arthritis
- 2-3 g a day
- For migraines must take daily, about 95% effective
- Begin with 125 mg and work up to 500-10000 mg a day.
- At 5 g a day it can cause digestive upset

Kava rt (piper methysticum)

- warm herb
- sedating, antispasmodic
- 1/50 of the strength of morphine
- blood moving properties
- 250 mg total kavalactones per day (can go much higher, the South Seas use 10 times that)

Hops

- Uses perluxan which is alpha acids from hops, similar action to Ibuprophan
- These alpha acids are very anti-inflammatory, can be compared to NSAIDS.
- Well tolerated by digestive
- Can’t really drink enough hop tea to have the same affect

Turmeric and Curcumin, the active ingredient in Turmeric

- use only a small amount
- good anti-inflammatory, often used for arthritis, safer than NSAIDS
- using with black pepper enhances effectiveness and absorption.
- Eating fat enhances absorption
- relieves pain in limbs, breaks up congestion, reduces fever

DL-Phenylalanine

- not d-phenylalanine which is synthesized and used as mood, energy enhancer
- has 50% of both the D and L form
- use about 2,000 mg a day, don't take late in the day or will energize

Devil's Claw

- Can use 1 tsp tincture three times a day or 1 cup tea 3 times a day - take 30 minutes before
- meals on empty stomach.
- Good for rheumatism and arthritis
- Can combine with meadowsweet or bogbean
- Not if taking blood thinners and it may lower blood sugar if diabetic so monitor.

FOR ACUTE INFLAMMATION

Turmeric (curcuma longa)

- not analgesic, it is anti-inflammatory
- mildly warming blood mover
- a little slow compared to willowbark, so if you take going to bed, you wake up relieved (8-10 hr)
- For an acute dose you need to take a whopping 1 oz of the powder (4 Tbsp). Stir in water, drink through straw while you don't breathe through your nose, and it goes down easier.
- For maintenance, take 2 g a day
- Extract (curcumin standardized) is available, standardized to 95% curcuminoids

Licorice (glycyrrhiza glabra)

- can get in capsules, tincture
- glabra is European, uralensis is chinese species
- this is not analgesic, it is anti-inflammatory qi and blood tonic
- mimics cortisol, sustains serum cortisol
- most widely used herb on the planet
- slightly loosens the stool so you won't be able to get above 5-7 g, it is a little slippery for the
- bowel
- can use caps or decoction

Scullcap (scutellaria baicalensis)

- known mainly as a liver herb in china
- flavonoids contribute to its anti-inflammatory
- can take 4 g a day or more safely
- doesn't take wonderful as a tea

Pycnogenol

- grapeseed is similar and cheaper
- 100-200mg a day or as needed

CHRONIC INFLAMMATION

Ginger

- universal remedy
- moves blood, has short term
- anti-inflammatory, but is warming and therefore pro anti-inflammatory in the long run good for migraine, take in the 20 min before the pain starts 2 heaping Tbsp dry ginger
- powder into water and drink it down quickly.
- Do again in 4 hours.

Cayenne (capsicum)

- good for cluster headaches
- slow acting, better for chronic situations eg.
- chronic low back pain start with 1/4 cap a day, work up to 4-5 caps a day.
- can use in powder form, capsules

Butterbur (petasites hybridus)

- use root and leaf
- popular in Europe for pain control
- using daily people had fewer migraine attacks and the pain was reduced
- about 95% effective
- now available as standardized extracts
- can take 50 mg tablet, twice a day

BAI ZHI ROOT (angelica anomala)

- acrid, warming, drying so be cautious if
- deficiency, person needs to stay moisturized (eg. using licorice)
- stops wind, pain
- good for headache syndromes, migraines
- must be used for cold wind migraines

- **consistently**
- **brings warming energy to the head**
- **take 3-15 grams a day**

Cinnamon (cinnamomum verum)

- **very good remedy for warming cold joints and stiffness if used over a period of time**
- **analgaesic**
- **use as tea, in cooking, powder, in capsules**
- **good for menstrual cramps (pretreat for 2 weeks), arthritis**

NUTRITION FOR PAIN

Vitamin D

- **1-4 chronic pain patients are low in Vit. D in U.S.**
- **30,000 IU a day for a month, then 6,000 IU a day**

Magnesium

- **after Vit. D, this is the 2nd most deficient nutrient in most people**
- **works in almost any form**
- **for migraines, muscle pain, menstrual cramps, heart palpitations**
- **magnesium oxide may cause loose stools**
- **magnesium glycinate is the least likely to**
- **cause loose stools so can use a higher dose**

Fish Oil

- **Take 2 capsules of Fish oil (fat/oil is usually taken from the cheeks of cold water fish), sometimes referred to as EPA:DHA usually in a 6:1 ratio. This is taken on an empty stomach 3 times a day as an anti-inflammatory**
- **do not confuse with cod liver oil which is more a nutrient tonic, high in Vit. A**

Myrrh Gum

- **analgesic, anti-inflammatory**
- **1 - 10 grams powder or caps**
- **moves congealed blood**

OTHER

- **Niacin increases the circulation. Taking 100mg or more will give a flush throughout the body as it pushes the circulation to the extremities, often taken for diabetic neuropathy several times a day. Adding Alpha Lipoic acid to the regime enhances the action.**

- **Glucosamine Condroitin for disc and joint pain. To rebuild tissue over a period of**
- **several months. Many find after a couple of years it has run its route and no longer effective.**
- **Cleansing internally. Many have found cleansing out the putrid matter from their bowels, and then doing liver and blood cleansing that pains and arthritis just disappear from the body. Herbs can be used for cleansing.**
- **Calcium for bone pain. Calcium can be difficult to absorb so you if you are already taking calcium, you may need to investigate why it is not being absorbed.**
- **Malic acid. Good for fibromyalgia**
- **Black pepper is a synergistic warming herb and often combined with other herbs for inflammation**
- **Avoid preservatives in foods, chemicals, and especially refined sugar(s).**

TOPICAL EXTERNAL HELP

- **Capsicum type patches and ointments**
- **Arnica herbal & essential oils**
- **Castor oil - it moves congestion, thereby bringing relief.**
- **Cold packs on the area for acute and recent injuries**
- **Warm or hot packs on the area for chronic or old injuries or pain.**
- **Tiger balm can be used on the temples for headache or on pain area, brings hot/cold feeling to the area.**
- **On line can get Bee Venom cream, good for pain relief, especially muscle pain and arthritis. Can get Botulinum Toxin & Bee Venom cream by HOUKEA. Also Ultra Strength Join Relief cream for Arthritis, with Bee Venom by EELHOE.**

Tissue Salts:

MAG PHOS - MAGNESIUM PHOSPHATE helps spasming, mainly in the nervous system, assists action of Kali Phos. For neuralgia, neuritis, sciatica, headaches with shooting darting stabs of pain, muscular twitching, cramps, convulsive fits, hiccups, menstrual pains, stomach cramps. If symptoms feel better with pressure or by using heat, this is the right remedy. Acts faster when taken with a sip of hot water.

HOMEOPATHIC FOR PAIN

You can use 6x strength or 30c. Both seem to work. 30C is usually used for more chronic conditions, but we see it work well for acute as well.

How do you know which one to use? You can do muscle testing, or pendelling, or can look up the individual remedies online and see what they do.

Gelsemium	**Cal phos**	**Rhus tox**	**Kali bi (small spots)**
Arnica	**Bryonia**	**Cimicifuga**	**Sanguinaria**

ARTHRITIS/RHEUM PAIN

Aconite	**Arnica**	**Belladonna**	**Bryonia**	**Calcarea phos**
Ledum	**Pulsatilla**	**Rhus tox**	**Calcarea carb**	
Caulophyllum thal.	**Caustcum**	**Cimicifuga**	**Dulcamara**	**Ruta grav.**
Colchicum				

GOUT/BIG TOE

Colchicum	**Ledum**	**Formica rufa**

TENDONS

Ruta Grav

KNEES, swelling

Apis	**Arnica**	**Bryonia**	**Benzoic ac.**	
Rhus tox	**Sticta Pul.**	**Benzoicum ac.**	**Silicea**	**Kali Iod**

FROZEN SHOULDER

Left	**Ferrum metallicum**
Right	**Kalmia latifolia**

EDEMA-Swelling

Apis	**Merc-c**

MODALITIES (amel/agg)

Heat makes better

Arsenicum	**Colocynth**	**Rhus tox**	**Phosphorus**	**Ruta**

Heat makes worse

Sulphur	**Bryonia**	**Pulsatilla**

Cold/damp aggrevates

Ruta	**Calcarea carb.**	**Dulcamara**	**Rhus tox**

Cold aggravates
Cimicifuga Calc phos

Cold ameliorates
Apis Ledum

Resting improves
Ruta Gelsemium

Resting aggravates
Rhus tox

Lying on back improves
Ruta

Lying on affected part worse
Sanguinaria

Motion makes better
Aurum Rhus tox Ruta Phosphorus

Motion makes worse
Bryonia

Rubbing ameliorates
Muriatic acid

Stretching ameliorates
Muriatic acid Ant-t Pulsatilla Nat mur Alumina Guai

Stretching aggravates
Staph Lycopodium Bryonia Mag-m Belladonna Rhus tox
Ran-b Am-c

Bending backwards ameliorates
Ant t Puls Calc

Nightime worse
Arsenicum Aurum Colchicum

Uncovering aggrevates
Muriatic acid

Pressure on part ameliorates
Arg-m Pulsatilla China Plumbum Bryonia
Coloc Con Drosera Mag-m Mag-p
Nat-c Silicae Stannum Ignatia

Gemmotherapy – see 'Free Oline Teachings'.

Ribes Nigrum (black currant) is for inflammation.
Combine Rubus, Vaccinium and Sequoia for pain in decalcification situations (arthritis)

COLOUR THERAPY

The best colours used for pain are blue and violet or purple. If you are interested in learning more about colour therapy, click on 'Free Online Teachings'.
